

Journée Utilisateurs OpenTURNS #19

Vendredi 12 juin 2026

EDF Lab – Saclay

8h30 – 9h30 : Accueil / Petit déjeuner

9h30 – 10h: Introduction, E. Decossin, Responsable du programme « Technologies de l'information EDF R&D »

10h – 11h : « Brief introduction to conformal prediction, with a discussion for computer experiments », S. da Veiga (ENSAI)

11h – 12h30 :

- New Features of OpenTURNS 1.26 and 1.27 and of Persalys: J. Schueller (PhiMeca), R. Lebrun (Airbus)
- Focus on: "Functional Chaos Expansion: OpenTURNS capabilities", A. Dutfoy (EDF)
- Focus on: "Optimization with OpenTURNS", M. Balesdent, L. Brevault (ONERA)
- Focus on: "Benchmarking integration features in OpenTURNS", M. Baudin, P. Borel and F. Husson (EDF)

12h30 – 14h : pause déjeuner

14h – 16h30 : Présentations d'études OpenTURNS *inside* (1/2)

- Sequential Design of Experiments using the LOLA-Voronoi Algorithm, M. Sahlke (Airbus)
- Polynomial chaos expansion for creating a monitoring indicator for hydroelectric turbines, M. Baudin and JC. Clément (EDF)
- Reliability of penstock pipes: estimation of complex probabilities of failures, A. Dumas (Phimeca), Ph. Bryla, E. Ardillon (EDF)
- othpc: OpenTURNS meets High-Performance Computing, E. Fekhari (EDF)
- otmeshing: Meshing capabilities in high dimension, R. Lebrun (Airbus), J. Schueller (PhiMeca)
- Management uncertainties through structural test pyramid for composite structures, E. Donfack Siewe (Airbus, Onera)

16h30 : Pause gourmande

AIRBUS
